

DUAL HANDBAG SYSTEM

Abstract

A dual handbag system that allows changing the appearance and function of a handbag. The system includes a handbag that has utility alone, in function and appearance. The system also includes an outer cover. The outer cover may include a divider and a zippered inner pocket. The handbag is insertable into the outer cover. Upper flaps fold down to engage over the handbag and secure the handbag to the outer cover. Magnets, snap fasteners, hook and loop fasteners or other types of fasteners may be used to secure the handbag in place relative to the outer cover. Partially open sides and top on the outer cover allow access into the handbag.
